

Distributor Training

Emuge's newly expanded, state-of-the-art Technology Center and classroom is available for training classes and seminars throughout the year. Equipped with 3 & 5 axis CNC vertical machining centers, the Emuge Technology Center provides hands-on demonstrations of the latest cutting tool designs and machining strategies. Product specialists host interactive learning sessions that help stimulate new ideas and answer questions about best practices and real-world manufacturing applications.

Emuge offers in-depth training in threading, milling and drilling as well as tool holding and precision workholding devices. Classes are tailored to meet the needs of today's manufacturing professionals.

- Thread specifications and nomenclature
- Thread gaging
- Threading techniques
- Form tapping
- Thread milling
- Milling applications
- 5-Axis milling
- High penetration rate drilling
- Tool holding devices
- Precision workholding devices

Huge thank you to the Emuge training team for putting together such a phenomenal training program! Your knowledge and hospitality were greatly appreciated - I highly recommend this program for anyone looking for more in-depth knowledge on tapping, thread milling, high speed drilling/milling.

**Shawn Costa,
Blackhawk Industrial**
